

Legal Aid Lawyers in Langley

Legal Aid Lawyers in Langley - Energy law for the emerging world of energy markets is our company's specialty. There are lots of challenges along with new opportunities for our company to help assist our various clients in taking advantage of this new world. Our energy law group provides a comprehensive array of legal services to local and global energy clients. We serve everybody from start-up businesses to major corporations. Whether your company provides solar energy technology or more conventional kinds of energy generation, both have complex transactional requirements. We provide realistic and sound suggestion and representation drawing on a depth of understanding of the political, legal and economic issues involved in energy concerns.

1. We help with new developments connected to renewable/alternative energy technologies (e.g., solar, wind, fuel cells, biofuels, biomass, geothermal and hydropower). In the case of the solar energy trade, we act for developers, manufacturers, and users in preparation of development agreements, land and roof leases, tax matters, financing agreements with investors, legislative and regulatory issues, and commercial arrangements;
2. We have knowledge in projects dealing with energy efficiency demand management and cogeneration including commercial, industrial and institutional contexts, including financing, engineering, and construction concerns;
3. We offer recommendation to private and public entities in respect of new statutory requirements to complete energy plans, and their land use plan integration;
4. We assist to negotiate and structure joint venture arrangements for energy projects, and could help in acquisitions, project financing and transfer and licensing arrangements;
5. Within the initial stages of financing and commercialization of clean technologies, we can offer many services to help;
6. We assist with compliance and approval with new environmental and energy law requirements (comprising carbon management and disclosure);
7. We assist to create, protect and commercialize intellectual property rights;
8. We are involved in venture capital opportunities, as well as private equity and initial public offering opportunities;
9. For problems such as "leave to construct" applications for both electricity and gas infrastructure, we could represent clients at hearings before regulatory commissions and agencies, creation of independent transmission companies, licensing, setting of rates, approvals, compliance matters and permitting
10. We counsel board of directors and senior management about problems of corporate governance and disclosure, environmental stewardship and liability issues, climate change, changing regulatory issues, and, where appropriate, assisting in representations to governments.
