

## Immigration Attorney Langley

Immigration Attorney Langley - There is an increasing concern about a lot of privacy problems these days and the complexity of new privacy legislation. The individuals working in the field, plus the organizations involved in biotechnology and information technology have unique legal needs. So do those who depend on technology so as to secure a competitive advantage for their business, or just to work in day-to-day operations. Our Technology, Privacy and Intellectual Property lawyers help clients in maximizing the use of intellectual property in their business operations. Our objective is to be able to create value for our clients.

We provide numerous services that handle privacy technology, biotechnology, intellectual property on an international and domestic basis. The assistance that we provide to our clients consist of trade-marks, copyright, commercialization, privacy, e-commerce, domain names, intellectual property, information technology and operational issues.

### Intellectual Property Services:

- Copyright
- Industrial Designs
- Licensing
- Trade Secrets
- Trade-marks

We help clients in obtaining, maintaining and enforcing intellectual property rights on a regional, national and international scale. Our clients come from a variety of businesses like entertainment, automotive, telecommunications and manufacturing.

### Technology Services:

- e-commerce initiatives
- protection, development, licensing, distribution and sale of technology
- acquisition of technology

We advise venture capitalists and financial institutions in structuring loan transactions to both users and suppliers of technology. We likewise advise companies about confidentiality agreements, computer system and Internet usage policies, consulting agreements, outsourcing arrangements, employment agreements, source code escrow, strategic alliances and joint ventures.

### Privacy Services:

To ensure compliance with privacy legislation, we assist many organizations, employees, contractors and suppliers. We can help several companies with their personal information management systems: crafting policy and privacy procedures, advising with respect to use, collection and disclosure of personal information. We assess Privacy Impact for clients' organizations or businesses.
