

Patent Lawyer Langley

Patent Lawyer Langley - Our Intellectual Property lawyers understand that for many companies their intellectual property is a real important asset. Intellectual property is an important component in retaining and attracting market share. It defines your business in the market place, whether by means of trademarks which identify your product, patents that exclude competitors, or copyright which prevents illegal replication of your intellectual assets.

We have numerous years of skill in the effective resolution and practical management of intellectual property disputes at all levels of the courts. Our clients comprise a wide range of trades, from start-ups to international businesses.

Our office believes that the main concern must be the client's objectives and what is sensible from a business perspective. Not each and every infringement of intellectual property rights necessarily warrants a court action. Intellectual property litigation is expensive because of the complexity of comprehensive analysis of rights and utilizing suitable professionals. Where infringement disputes are straight-forward and simple, disputes normally can be resolved through negotiated arrangements with built in deterrence terms. In circumstances where court action is required, we use strategies that match a business-oriented method.

Our company and its lawyers are really skilled and experienced in representing our clients in claims of intellectual property infringement. Our renowned litigators have the knowledge to communicate to the courts the technical problems involved, whether you need defending against allegations of intellectual property infringement, or you are an owner of intellectual property pursuing infringers. We provide legal representation and advice in disputes associated to trademarks, copyright, patents, industrial design, trade secrets, domain names, interlocutory injunctions ("emergency" relief from infringement pending trial) and Anton Pillar Orders (seizure orders and civil search).
