

Criminal Law Firms in Langley

Criminal Law Firms in Langley - Our Intellectual Property & Technology Practice offers various services to clients regarding all aspects of intellectual property law. This consists of industrial designs, copyrights, trade-marks, licensing, software, confidentiality, trade secrets, biotechnology, and various technology problems. We are proactive in our approach to providing timely solutions to clients' concerns.

We provide our services to numerous clients from both the private and public sectors. Our passionate business clients care about the innovative services and products, offering the creative energy in order to be successful. They come from diverse fields such as the software, music, film, service, manufacturing and travel industries. Our company provides sophisticated legal tools and services meant to secure and protect our clients' products and services. When clients have international concerns, we work extensively with foreign legal counsel in order to offer solutions.

Our practice seeks to apply innovative approaches to solving business and technology issues. We keep up to date with trends in emerging technology and media, alert to any potential legal effect on our clients. To ensure various legal services are obtainable to our clients, our lawyers form client teams with various lawyers, when appropriate.

Copyright

The members of our practice offer professional suggestion about international copyright conventions and copyright legislation. Copyright holders would receive suggestion concerning enforcement and infringement. We even draft and review license arrangements, and help with the registration and protection of clients' copyright both internationally and domestically.

Trade-marks

As registered Trade-mark Agents, we prosecute and prepare trade-mark applications, conduct name searches and trade-mark, represent clients in trade-mark litigation, get pre-clearance and clearance both globally and nationally, and carry out trade-mark licensing. We draw upon established relationships with a broad network of trade-mark agents within different jurisdictions to assist clients involved in globalized name and mark arrangements. This ensures smooth delivery on an inter-jurisdictional basis. Clients get assistance in the enforcement of trade-mark rights and the resolution of disputes in the courts and administrative forums.

Technology

We now have clients who are involved in the commercialization and development of new software and various innovative products and services. Our existing services can assist the several emerging and new organizations and companies in the following fields: pharmaceuticals, nutraceutical, hospitals, biotechnology; video game publishing and development; and software design and publishing. Our technology experts advise clients regarding issues like for instance e-business and the internet, utilizing "open source" code, technology transfers, system acquisitions, licensing, technology aspects of commercial transactions and mergers, joint ventures, distribution agreements, corporate structure and financing, and strategic alliances.

Patents

The members in our practice give practical legal advice to clients about contractual matters associated to patents, such as the licensing and acquisition of patent rights.

Industrial Design

Our industrial design experts assist clients in the prosecution and preparation of industrial design registrations in Canada. Appropriate referrals to U.S. agents in connection with design patents in the United States could even be provided.

Litigation

We act for our clients in litigation relating to issues like disputes involving industrial design, copyright, licensing, confidentiality agreement, trade secrets, patents, trade-marks, and passing off.
